

Proposition 109 Authorize Bonds for Highway Projects

Proposition 109 proposes amending the Colorado statutes to:

- ♦ require the state to borrow up to \$3.5 billion in 2019 to fund up to 66 specific highway projects;
- ♦ direct the state to identify a source of funds to repay the borrowed amount without raising taxes or fees; and
- ♦ limit the total repayment amount, including principal and interest, to \$5.2 billion over 20 years.

Summary and Analysis

This analysis outlines current state highway funding and describes the bond sale and repayment authorized by the measure for a specific list of statewide road and bridge projects. The analysis also describes transportation funding commitments that are conditional on the outcome of this measure.

Current state highway funding. Maintenance and construction of state highways are funded through the Colorado Department of Transportation (CDOT). CDOT receives most of its revenue from federal and state gasoline and diesel fuel taxes and from state vehicle registration fees, as shown in Figure 1. For state budget year 2017-18, CDOT spent approximately \$1.2 billion, or roughly 85 percent of its revenue, on state highway maintenance and operations and \$220.5 million, or 15 percent, on construction.

State Gas Tax \$321.6 million

*Other funding sources include federal grants, tolls, and other state and local funds.

Bond sale and repayment. Proposition 109 directs CDOT to borrow up to \$3.5 billion by selling transportation revenue bonds. The total repayment amount, including principal and interest, is limited to \$5.2 billion. The bonds must be repaid in 20 years, and the state must reserve the right to repay the bonds ahead of schedule without penalty. Assuming the repayment schedule is for the full \$5.2 billion over 20 years, the average annual repayment cost will be \$260 million. Actual repayment amounts will vary depending on the terms of the revenue bonds.

Past bond sale and repayment for transportation projects. In 1999, voters approved the sale of \$1.5 billion worth of bonds for transportation projects. The state was required to use the borrowed money to pay for up to 24 transportation projects across the state. Repayment costs for the 1999 bonds totaled \$2.3 billion. The debt was fully repaid through various state and federal sources in December 2016.

Transportation funding commitments conditional on the outcome of Proposition 109. In the last two years, the state legislature passed two laws to increase funding for future transportation projects. In 2017, the state committed \$1.5 billion for transportation projects through the sale and lease-back of state buildings. In 2018, the state devoted another \$1.0 billion over a 20-year period for transportation projects from existing state revenues. Under current law, the \$3.5 billion in proposed borrowing will replace these commitments, resulting in a net increase of \$1.0 billion for transportation.

Road and bridge projects. Borrowed money under Proposition 109 may only be used for road and bridge expansion, construction, maintenance, and repair on the 66 transportation projects located throughout the state identified in the measure on pages X through XX. The funding provided through the measure is not enough to pay for all the projects identified in the measure; the estimated cost of the projects is \$5.6 billion. The final selection and order of construction will be determined by CDOT and the Transportation Commission, an 11-member body appointed by the Governor to prioritize statewide transportation needs.

Arguments For

- 1) Proposition 109 accelerates the construction of essential highway projects without raising taxes or fees. Building and maintaining a highway system are core functions of government. The state has failed to invest sufficient funds to maintain and expand the highway system. The measure corrects this by directing the state to prioritize highway projects ahead of other programs.

- 2) The lack of highway capacity is the most significant contributor to traffic congestion in the state and causes delays, increases business costs, and reduces driver and passenger safety. The measure requires the state to invest more money in transportation, improving the state's economy and quality of life.

Arguments Against

- 1) Proposition 109 commits up to \$5.2 billion to repay borrowing without creating a new source of revenue. This commitment diverts money from other programs, which may include education, health care, and routine transportation maintenance. Furthermore, the measure would pay for only a portion of the projects and fails to address the cost of ongoing maintenance of these projects.
- 2) In 2018, the state demonstrated its commitment to transportation funding by pledging \$1.0 billion from existing revenue sources. If Proposition 109 passes, it replaces this commitment with borrowed money. Borrowing is expensive. Under this measure, approximately \$1.7 billion in taxpayer money will be spent on interest payments.

Estimate of Fiscal Impact

Proposition 109 makes changes to transportation finance over 20 years. Its effects on state revenue and expenditures are summarized below.

State revenue. The measure requires the state to sell revenue bonds, which will increase state revenue by up to \$3.5 billion. Under current law, bond revenue collected under Proposition 109 will replace \$1.5 billion in state revenue from the sale and lease-back of state buildings. On net, Proposition 109 increases state revenue by up to \$2.0 billion.

State expenditures. The measure authorizes \$3.5 billion in state revenue from the sale of bonds to be spent on transportation projects. However, current state law directs other funding commitments to be cancelled if the measure passes, resulting in a net increase in spending on transportation of up to \$1.0 billion.

The measure commits up to \$5.2 billion to the repayment of debt. These financing costs will replace the \$2.25 billion in financing costs related to the sale and lease-back of state buildings, resulting in a net increase in financing costs of up to \$2.95 billion.

Proposition 109 Authorize Bonds for Highway Projects

Jon Caldara, representing the Independence Institute:

In the “purposes” you don’t say the real purpose which is to borrow \$3.5 billion for specific transportation projects and have the state repay the borrowed amount, without raising taxes or fees, by reallocating less than 2% of the state budget.

That’s the whole purpose for the initiative!!!! That should be stated right at first. Not to do so seems hostile towards the measure.

In the arguments for you fail to mention that the projects are listed in the wording of the measure itself. Voters know exactly what they are going to get.

Thanks you.

Michael Lewis, representing the Colorado Department of Transportation:

The Colorado Department of Transportation (CDOT) and Transportation Commission (TC) are encouraged that two ballot issues are being proposed to address critical transportation needs in the state of Colorado. As such we have been working to provide the most accurate information to the public about how we would implement the voters' intent, should either of the initiatives pass.

As the primary tool to inform the public about proposed ballot issues, the Blue Book is relied upon by agencies like the Colorado Department of Transportation to accurately communicate facts and information about them. We greatly appreciate the effort that it takes to ensure the appropriate detail is included, in order to be consistent in its discussion of the impacts of the two upcoming transportation ballot initiatives, and of how CDOT may implement them.

The current Blue Book draft appears to have an inconsistent analysis of the two initiatives. We would appreciate the Legislative Council consider the following:

- **Initiative 167:** The draft Initiative 167 section includes a map of all of the listed projects. While the Blue Book text correctly acknowledges that the project list contained in Initiative 167 will cost approximately \$5.6 billion and will need to be adjusted down to account for the \$3.5 billion actually available for construction of the improvements, we are concerned that inclusion of a map that shows all the projects could mislead the voters.

It would also be important to note that SB 18-001 repeals the final three years of transportation funding under SB 17-267 should Initiative 167 be passed. SB 17-267 provided for an issuance of \$1.88 billion in Certificates of Participation (COPs) for projects around the state. The repeal would eliminate \$1.5 billion, making the net benefit of the passage of Initiative 167 \$2 billion, rather than \$3.5 billion.

Last Draft Comments from Interested Parties

Michael Lewis, representing the Colorado Department of Transportation (cont.):

Request: We request that you either eliminate the map or adjust the map to more accurately reflect the impact of Initiative 167. CDOT would also be able to provide additional information on how we would implement the project plan.

Again, in order to provide the public with the most accurate and consistent information on the content of the potential ballot issues as well as how CDOT would implement the proposed initiatives, we request that the Legislative Council apply a consistent analysis to the two initiatives. At a minimum, we would request that both initiatives be treated equally in inclusion or removal of a map.

Thank you for your attention to this matter. We appreciate the complexities you have to consider when developing the Blue Book for voters and providing them with the most accurate and consistent information. Please let us know if you have any questions or would like to discuss this material in greater detail.

Shayne Madsen, representing the Independence Institute and the Fix Our Damn Roads Issue Committee:

Thank you for the opportunity to submit these final comments. On behalf of the Independence Institute and the Fix Our Damn Roads issue committee, we have the following comments:

First we request that the third bullet on the first page, lines 6 & 7 be redrafted to state "direct the state to reallocate less than 2% of the budget to repay the borrowed amount without raising taxes or fees." This revision will fairly and objectively reflect the intent and language of the measure.

Second, in the Arguments For section (where deference is given to the proponents of the measure), please add "or fees" on line 5 to reflect the actual language of the measure and be consistent with the staff blue book draft. The next sentence is not needed so we suggest that the sentence beginning with "Building" on lines 5 and 6 be deleted in its entirety. The last sentence in lines 7 and 8 should be revised to read "The measure corrects this by directing the state to re-prioritize less than 2% of the state budget to pay for the costs of transportation borrowing."

Carla Perez, representing Let's Go Colorado:

Ms. Perez submitted written comments (Attachment A).

Eric Richardson, representing the Colorado Department of Transportation:

Page 3 Map: Should make it clear that this map was not put together by CDOT, and it contains \$5.6 billion worth of projects that cannot be completed with potentially \$3.5 billion in bonds. Underneath the map, language such as: "Map illustrates \$5.6 billion in project expenditures. Map source: Initiative #167 Sponsors."

Comment: Delete this language. This is not an increase in new funding if CDOT has to make the bond payments from existing funds should the legislature be unable or choose not to make a fund transfer to CDOT.

Comment: Need to recognize that all projects can be built under this proposal.

Comment: Map is inaccurate because it gives the reader the impression that these projects can be built under the initiative and they cannot because of insufficient funds in the proposal.

Arguments For

- 1) Proposition 1 accelerates the construction of essential highway projects without raising taxes or fees. Building and maintaining a highway system are core functions of government. The state has failed to invest sufficient funds to maintain and expand the highway system. The measure corrects this by directing the state to prioritize highway projects ahead of other programs.
- 2) The lack of highway capacity is the most significant contributor to traffic congestion in the state and causes delays, increases business costs, and reduces driver and passenger safety. The measure requires the state to invest more money in transportation, improving the state's economy and quality of life.

1 Arguments Against

2 1) Proposition ? commits up to \$5.2 billion to repay borrowing without creating a
3 new source of revenue. This commitment diverts money from other programs,
4 which may include education, health care, and routine transportation
5 maintenance. Furthermore, the measure would pay for only a portion of the
6 projects and fails to address the cost of ongoing maintenance of these projects.

7 2) In 2018, the state demonstrated its commitment to transportation funding by
8 pledging \$1.0 billion from existing revenue sources. If Proposition ? passes, it
9 replaces this commitment with borrowed money. Borrowing is expensive. Under
10 this measure, approximately \$1.7 billion in taxpayer money will be spent on
11 interest payments.

12 Estimate of Fiscal Impact

13 Proposition ? makes changes to transportation finance over 20 years. Its effects on
14 state revenue and expenditures are summarized below.

15 **State revenue.** The measure requires the state to sell revenue bonds, which will
16 increase state revenue by up to \$3.5 billion. Under current law, bond revenue collected
17 under Proposition ? will replace \$1.5 billion in state revenue from the sale and
18 lease-back of state buildings. On net, Proposition ? increases state revenue by up to
19 \$2.0 billion.

20 **State expenditures.** The measure authorizes \$3.5 billion in state revenue from the
21 sale of bonds to be spent on transportation projects. However, current state law directs
22 other funding commitments to be cancelled if the measure passes, resulting in a net
23 increase in spending on transportation of up to \$1.0 billion.

24 The measure commits up to \$5.2 billion to the repayment of debt. These financing
25 costs will replace the \$2.25 billion in financing costs related to the sale and lease-back of
26 state buildings, resulting in a net increase in financing costs of up to \$2.95 billion.
