HB26-1018 Long-term Care Services for Nursing Home Residents

Typed Text of Testimony Submitted

Name, Position, Representing	Typed Text of Testimony
Ingrid Moore For themselves	I support this bill. Given that, I can see where certain appropriate amendments could improve some areas of possible objection. What I like about the bill is that it ensures vulnerable individuals leaving nursing facilities have necessary care services in place before discharge, preventing gaps in care that could lead to health crises or homelessness. The streamlined presumptive eligibility process removes bureaucratic delays that currently keep people in institutional settings longer than medically necessary.
Brian Burgstahler For Mad Moms of Colorado and self	Dear legislators, My husband and I totally agree with this bill. People with cognitive impairment disabilities, and similar serious dementia types of brain disorders may need injectable medications. We see no reason trained CNA's couldn't administer this. The regulations stated support a safe and helpful care facility for all of families loved ones. Thank you supporting this quality Bill! Sincerely, Brian and Jackie Burgstahler Johnstown, CO
